

## Home Business

No, this isn't a site for opportunities.

Most of the people working at home within these communities already have/had a job/skill/opportunity elsewhere and are now working from their residences. Or maybe it's a new endeavor -- who knows. But it is a fact of life, that people are now working at home.

They like being in a community: It's convenient, it's nice, it's home, it's quiet, it's business, as usual, and it's business at its best.

How do they relate? Or, do they need more business -- less business?

If you have any comments or ideas about working at home, please SUBMIT them on the home page.
